For the second year in a row, Poland is showcasing its top construction sector companies in Dublin!

After last year’s Summit, **Polish companies successfully delivered multiple modular housing projects in Ireland**, helping to increase housing stock and ease pressure on the sector.

Poland’s **Modern Methods of Construction (MMC)** offer faster, more efficient, and sustainable solutions to housing market challenges. By shifting much of the build process to factory settings, MMC reduces costs, shortens project timelines, and enhances quality control - all while lowering carbon emissions compared to traditional on-site construction.

- ✔ Source high-quality modular housing & prefabricated solutions
- ✔ Meet leading Polish construction materials suppliers & industry experts
- ✔ Discover innovative technologies for Smart Cities of the future

📍 **Visit us at Stand I18** to connect with Polish companies and explore their solutions.

**Polish Investment & Trade Agency (PAIH)** is here to help you find trusted suppliers, investment opportunities, and market insights. Contact us for expert advice on sourcing from Poland and partnering with industry leaders.

LAUNCHING MAY 2025

ACCELERATE YOUR MMC EXPERTISE

Build the skills to shape your future in construction.

The way we build is evolving—new skills are essential. Modern Methods of Construction (MMC) is driving faster, smarter and more sustainable building through off-site manufacturing, digital technologies and innovative materials.

Launching in May 2025, the Skillnet MMC Accelerate Platform will be Ireland’s hub for specialist MMC training and upskilling, helping construction professionals and businesses gain the skills to adopt and implement MMC effectively.

Access expert-led training tailored to the future of MMC

Explore career pathways in Ireland’s fastest-growing construction sector

Learn practical MMC skills through real-world case studies

Join our events for hands-on learning and industry insights

Shape your future in MMC
